Certificates

Overview of certificates

ISO27001

ISO 27001 examines the information security management system (ISMS) used – with a particular focus on the protection objectives of confidentiality, availability and integrity of information as well as on risk assessments.

Software made in Germany

The Federal Association of IT SMEs is under the patronage of the Federal Ministry for Economic Affairs and Climate Protection and thus guarantees manufacturer-independent neutrality. The seal stands for quality, service and the future viability of software products.

IDW PS 880

The audit standard IDW PS 880 "The audit of software products" of the Institute of Public Auditors confirms that audited OMNITRACKER-based applications meet the high quality standards of the highly regulated financial industry.

IDW PS 951

OMNINET's software development processes have successfully passed an audit in accordance with IDW PS 951 "Audit of the internal control system at the service provider for functions outsourced to the service provider". This involved product management, software architecture, development as well as test and release management processes.
