### 1. Acceptance of Contract

The Customer hereby accepts and acknowledges as satisfactory the prices, specifications and conditions herein. The Customer authorizes the Contractor to perform the Work. The Work will be completed in a substantially workmanlike manner. The Customer agrees to pay the Contractor the Contract Price specified above. Any alterations or deviations from the above specifications involving extra costs will be executed only upon written orders and will result in an extra charge over and above the Contract Price. Performance of the Work shall be excused in the event of any strike, accident or delay beyond the Contractor's control.

### 2. Main Office Approval

All contracts are subject to approval by the Contractor's main office. If the Contractor's main office rejects any contract, it is validly canceled without further responsibility on the part of the Contractor, except to return any money paid pursuant to this Contract. Subject to the cancellation right described on the last page of this Contract, when the Contractor's main office accepts this Contract, it constitutes a binding contract covering all agreements expressed or implied in this Contract, and no other agreements, oral or written, expressed or implied, shall limit or qualify the terms of this Contract.

### 3. Deposit Notice

The owner may contact an attorney to determine his rights to discharge a mechanic's lien.**

### 5. Grant of Security Interest and Contractor's Right of Possession

If the Customer decides to finance any part of the Contract Price through the Contractor, the Customer grants the Contractor a security interest in the equipment sold hereunder and authorizes the Contractor to file financing statements without the Customer's signature. In addition to the Contractor's right as a secured party and all other rights, the Contractor also has the right at any time for credit reasons or because of the Customer's default to possess, retake and/or repossess all equipment and component parts that may have been delivered to the Customer, or withhold the equipment delivery in whole or in part, without the necessity of taking any other proceedings, and the Customer consents that all equipment and component parts retaken or repossessed shall become the absolute property of the Contractor provided that the Customer is given full credit thereof. Installation of solar can be free with a third party financing option. Energy produced by the panels can be purchased at a rate lower than current utility rates for power.

# HOW SOLAR WORKS

- You remain connected to your existing electricity provider. The solar energy you produce is used first and your electricity provider supplements the rest. The more energy you generate, the more you save.
- When it's dark, your home will automatically use energy from your utility.
- Since your meter may actually spin backwards during the day, any power you generate that you don't use is applied to your utility bill as a credit!

- 1 The sun emits radiant energy. Certain materials like silicone and crystal can absorb this energy. 
- 2 Solar photovoltaic panels, which can be installed for FREE, absorb the sun's energy. An inverter converts this energy into electricity for your home or business. 
- 3 Power gets distributed throughout your home or business for use. Any excess energy produced will flow back out to the energy grid. 
- 4 The utility grid will provide power to your home if your needs exceed the energy produced from your solar system.

**TRINITY SOLAR IS A SHINING  
EXAMPLE OF A FAMILY-OWNED  
BUSINESS SUCCESS STORY.  
HOMEGROWN YET ALWAYS  
EXPANDING, WE'RE EXCITED TO  
INTRODUCE OUR FAMILY TO YOURS.**

It was 2004 when Trinity Heating and Air, Inc. became Trinity Solar, bringing a decade of experience and well-earned accolades to the solar industry. Since then, Trinity has installed 23,000+ solar power systems, grown to 1300+ employees, has become one of the largest solar providers on the East Coast, and is the largest privately held solar installation company in the nation. Trinity's tremendous success is personal in nature, based on high standards and hands-on management of a family-owned business; and it's professional, as a licensed electrical contractor, employing NABCEP certified professionals.

Trinity Solar has become a proven leader by differentiating itself from others in the Solar Industry. Trinity has served more homes and business owners than almost any other solar provider in the region.

*Most impressive was the team work and dedication to detail. I have been in the service industry for 37 years and I will tell you that if John and his team are what Trinity Solar is about, then your company has my utmost respect and admiration. Also, thank you for fielding my inquiries and getting back to me so soon each time.*

Trinity Solar's growth can be credited to the vision of management, the dedication of the staff, and the maintenance of a strong brand. Trinity is founded on the strong moral principles of the owners, and from the beginning, we have been committed to doing what is right. Trinity Solar has the distinction of ranking as a leader throughout the Northeast solar market, and has been an industry leader for over ten years.

Tom & Bill Pollock saw a barely budding solar market in 2004 as the perfect opportunity to help local homeowners save money on their electric bills, support a sustainable energy source, and do something great for the environment. In subsequent years, we entered the commercial sector to become a major player in that arena. In fact, we have installed one of the largest roof-mounted solar systems ever to be installed in the United States. We have been committed to bringing the benefits of solar energy to people and businesses all over the region. As one of the leading providers in the region, Trinity has helped to define and grow the East Coast solar market. We have succeeded in expanding

our market throughout New York, Connecticut, Massachusetts, Rhode Island, and Maryland.

Trinity Solar strives to recruit and develop employees who are committed to fulfilling our goals of energy excellence and customer service. Having been recognized as one of the "Best Places to Work"\* in New Jersey, Trinity Solar takes pride in the team that has been assembled to serve our clients. In order to sustain our growth, we are sure to keep employees happy, safe and meeting their full potential. We experience very low employee turnover. In fact, many of the original employees who were brought on board in 1994 are still valued members of the Trinity team. When we bring an individual on board, we are fully committed to their success within our organization. Trinity offers incentives to recognize and reward exceptional work, and we are happy to promote from within as our organization continues to grow.
