United States Patent **10,222,937**
Wallace , et al. **March 5, 2019**

System and method for variant content navigation

Abstract

A method and system for managing hierarchical content having a plurality of messages where a navigation widget with message zones receives messages from a message database. When a message zone is selected, a message list is updated to show only those messages specific to that message zone. When a message from the message list is selected, the message zone renders a preview of the selected message within the message zone.

Inventors: **Wallace; Matthew** (Kitchener, **CA**), **Lehman; Andrew** (Waterloo, **CA**), **Janssen; Jeff** (Waterloo, **CA**)

Applicant:

Name	City	State	Country	Type
Prinova, Inc.	Toronto	N/A	CA	

Assignee: ***Messagepoint Inc.*** (Toronto, **CA**)

Family ID: **51589118**
Appl. No.: **14/488,605**
Filed: **September 17, 2014**
