PAT. NO.	Title
1 11,346,186	Oil recovery tool and system
2 10,704,938	Pumpjack production well including fluid sensor having 2-dimensional venturi and capacitive flow sensor
3 8,113,278	System and method for enhanced oil recovery using an in-situ seismic energy generator
4 6,870,795	Acoustic source array system module for underwater operation which can be installed on a motorized boat
5 6,771,561	Sonar system especially for shallow water application such as in littoral environments
6 6,606,958	Towed acoustic source array system for marine applications
7 6,378,951	Vibratory pavement breaker
8 6,185,156	Underwater acoustic impulse source
9 5,995,452	System for generating and transmitting acoustic signals underwater
10 5,841,733	Acoustic source array system for underwater operation
11 5,515,055	System for processing returns from a target from transmissions containing repeated signals to detect the doppler velocity of the target
12 5,378,951	Friction welder which produces orbital motion and drive therefor
13 5,277,744	Friction welder having a drive which produces orbital motion
14 5,212,490	Echo ranging system for detecting velocity and range of targets using composite doppler invariant-like transmissions with suppression of false targets
15 5,212,489	Echo ranging system for detecting velocity of targets using composite doppler invariant transmissions
16 5,160,393	Friction welder having an electromagnetic drive which produces orbital motion
17 4,799,201	Methods and apparatus for reducing correlation sidelobe interference in seismic profiling systems
18 4,758,997	Method and apparatus for the generation and transmission of signals for echo location and other signaling purposes, particularly in geophysical exploration
19 4,753,316	Seismic source
20 4,729,066	Method and apparatus for the generation and transmission of signals for echo location and other signaling purposes, particularly in geophysical exploration
