company profile

CETC Network & Communications Group Co., Ltd. (CENC for short) was established in September 2017 with a registered capital of RMB 3 billion. In 2019, the total operating income was RMB 21.715 billion and the total profit was RMB 1.706 billion. Headquartered in Shijiazhuang, Hebei Province, it is composed of five communication research institutes (the 7th Research Institute, the 34th Research Institute, the 39th Research Institute, the 50th Research Institute, and the 54th Research Institute) and their affiliated companies authorized by China Electronics Technology Group Corporation (hereinafter referred to as the "Group Company"), including a listed company (Jiesai Technology, stock code: 002544). There are 16 parks distributed in Guangzhou, Guilin, Xi'an, Shanghai, Shijiazhuang, Beijing, Shenzhen and other places.

China Netcom currently has more than 18,000 employees and more than 11,000 scientific and technological personnel, including 1 academician of the Chinese Academy of Engineering, 7 chief scientists and 7 chief experts of the group company, more than 90 technical experts at the provincial and ministerial levels, more than 360 researchers, more than 2,500 senior engineers, and more than 8,100 engineers and other personnel. It has 2 postdoctoral workstations, 2 national engineering research centers, 2 national key laboratories, military calibration and testing laboratory accreditation and National Accreditation Committee for Conformity Assessment laboratory accreditation qualifications, and has complete research, design, trial production, production, testing and inspection certification capabilities. It has won more than 1,100 provincial and ministerial science and technology progress awards and more than 1,400 invention patents, and has presided over the formulation of more than 240 national and industry standards.

China Netcom's main business and products cover military electronics, civilian products industry and international business. In terms of military electronics, it covers professional fields such as military communications, military measurement and control, satellite navigation and positioning, communications and network confrontation, reconnaissance intelligence, aerospace ground integrated applications, and antennas. In the civilian industry, an industrial sector system has been formed with communication systems and networks, satellite navigation and location services, space integrated information systems and services, smart information applications, shared basic products and high-end service industries as the main businesses. In terms of international business, products are distributed in more than 70 countries in Asia, Africa, Europe, South America, North America and Oceania. It has undertaken the development of the international square kilometer array radio telescope SKA project and established long-term cooperative relations with many foreign scientific research institutions, universities and companies.

Under the strong leadership of the group company, China Network Communication adheres to the core values of "responsibility, innovation, excellence and sharing", takes the development policy of "military-oriented, civilian-oriented, military-civilian integration" as a guide, insists on serving the society with first-class products and quality, relies on continuous innovation and integrity to achieve

common development with customers, strives unremittingly to build a world-class high-tech enterprise group in the field of network information, and writes a new chapter for the realization of the Chinese dream of the great rejuvenation of the Chinese nation!
