Its open innovation approach, together with the cross-contamination of different operational domains and a constant focus on issues of environmental sustainability, allow Telespazio to operate in sectors that will become increasingly important in the years to come: from communication and positioning services for the **Moon** to management and monitoring of satellites and other orbiting objects (Space Domain Awareness), and creation of advanced in orbit services and satellite operation of drones and unmanned vehicles.

Moreover, using innovations such as artificial intelligence and machine learning to process big data from satellites, Telespazio is in the front lines of development of space applications capable of improving people's lives on our planet and helping to win the great challenges of our times, such as the effects of climate change.

Closer to Space

Telespazio is a joint venture between **Leonardo** (67%) and **Thales** (33%) and one of the world's biggest suppliers of satellite solutions and services. The company teams up with Thales Alenia Space to form the parent companies' Space Alliance, a strategic partnership which offers a complete range of space services.

Founded in Italy in 1961, Telespazio is based in Rome and counts more than 3000 employees through its various subsidiaries and joint ventures.

Telespazio is present in France and French Guyana through **Telespazio France**; in Belgium and the Netherlands with **Telespazio Belgium**; in Germany with **Telespazio Germany**, **GAF** and **Spaceopal** (a joint venture with the German Space Agency DLR), in the United Kingdom with **Telespazio UK**; in Spain with **Telespazio Ibérica**; and in Romania with **Rartel**.

The company operates in Latin America through **Telespazio Brasil** and **Telespazio Argentina** and has sales office in **Chile, Colombia, Costa Rica** and **Peru**.

In Italy, it can count on e-GEOS, a leader in geoinformation services 20% owned by the Italian Space Agency.

With know-how acquired over 60 years in the business, an international network of space centres and teleports - including the Fucino Space Centre, one of the world's most important for civil uses - and participation in space programmes such as Galileo, EGNOS, Copernicus and COSMO-SkyMed, Telespazio serves the market as service provider and large mission integrator, offering services for the upstream, midstream and downstream segments to help space missions achieve their goals.
