# RECORD: PORT OF ITAJAÍ SURPASSES ANNUAL REVENUE OF 2024 IN THE FIRST HALF OF THE YEAR, REACHING R\$89.8 MILLION.

The Port of Itajaí has already surpassed, in the first half of 2025, all the revenue recorded throughout 2024. In just six months, the terminal reached R\$ 89,824,000 in revenue, exceeding the R\$ 86 million collected during the entire previous year.

“With consistent gains in operational efficiency and logistics productivity, the Port of Itajaí reinforces its competitiveness and conveys to the market the confidence of a public terminal in full recovery and ready to meet the demands of foreign trade,” highlighted the superintendent of the Port of Itajaí, João Paulo Tavares Bastos.

The impressive performance reflects Itajaí’s consolidation as one of the main logistics players in the country, highlighting its efficiency and operational capacity in different types of cargo.

Among the operations that contributed to this milestone are Roll-on/Roll-off (Ro-Ro) shipments, which enable the transport of vehicles on specialized vessels. The largest operation of this type ever carried out in Brazil took place at the Port of Itajaí, with the arrival of the BYD Shenzhen vessel, responsible for unloading more than 7,000 vehicles from the Chinese automaker.

In addition to BYD, the terminal also handled vehicles from BMW, reinforcing its strategic role in the national and international automotive supply chain.

These operations place Itajaí, once again, on the priority route of national logistics, highlighting the direct impact of the port sector on the economy of Santa Catarina and Brazil as a whole.

“The Port of Itajaí has also stood out in general cargo ships, generating more income for port workers,” the superintendent highlighted.
